ACADEMIC PROJECTS

VendorVerse | *React, Node.js, Express.js, MongoDB, JWT, TailwindCSS, Redux*

[Live](#)

[GitHub](#)

- Built a **production-grade multi-vendor e-commerce platform** with **three distinct role-based dashboards** (Admin, Vendor, Buyer) using **RequireRole middleware**, enforcing granular access control across all protected routes.
- Engineered a **complete order lifecycle system** with dedicated Order, Product, Review, and Vendor models; implemented **vendor product management APIs** enabling vendors to independently list, update, and track inventory.
- Implemented **persistent cart management** via React Context API, **checkout flow**, and **buyer order history** with real-time order status tracking; deployed full-stack app on **Vercel** with **MongoDB Atlas** cloud database.

ChainVerify | *React, Node.js, Express.js, MongoDB, Solidity, Ethereum, Ethers.js*

[Live](#)

[GitHub](#)

- Architected a **MERN stack document verification platform** with **JWT authentication** and **RESTful APIs**, enabling secure document uploads, tamper-proof validation, and scalable cloud infrastructure on Vercel and MongoDB Atlas.
- Integrated **Ethereum smart contracts (Solidity)** via Ethers.js to store **SHA-256 cryptographic hashes** on the Sepolia testnet blockchain, achieving fully **decentralized and immutable document verification**.
- Optimized **MongoDB query performance** through indexing and schema design, reducing **API response latency by 40%**.

FinTrack | *React, Node.js, Express.js, MongoDB, TailwindCSS, Recharts*

[Live](#)

[GitHub](#)

- Developed a full-stack **MERN stock portfolio dashboard** integrating **real-time market data** via **Finnhub API**, enabling users to simulate live trading, monitor portfolio performance, and track investment history.
- Designed **10+ RESTful APIs** with **JWT authentication** and **role-based access control**; built interactive **Recharts data visualization** dashboard rendering real-time profit/loss analytics and portfolio allocation insights.
